In the context of large language models, a token is a basic unit of text that the model processes and predicts. Tokens can be individual words, punctuation marks, or even parts of words.

GPT3.5 has ~ 4 k token memory, GPT4 32k, Claude 100k, research coming out for 1M token models

A helpful rule of thumb is that one token generally corresponds to ~4 characters of text for common English text. This translates to roughly • of a word (so 100 tokens ~= 75 words).

Common tokenization schemes include word-level tokenization, subword-level tokenization, and character-level tokenization.

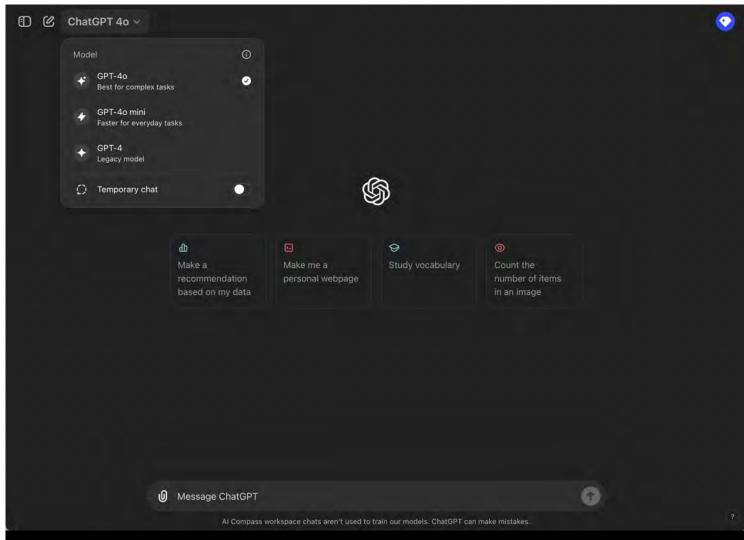

TEXT TOKENIDS

1 token = +-3/4 word

1.GPT-4 is speculated to have been trained on approximately 13 trillion tokens of text and possesses about 1.3 trillion parameters or connections.

you are an expert in sleeping and mattresses explain how to choose a good mattress

ChatGPT

Choosing a good mattress is crucial for ensuring a comfortable and restorative night's sleep. Here's a comprehensive guide to help you find the perfect mattress based on several key factors:

1. Understand Mattress Types

- . Innerspring: Traditional and widely available, offering various firmness levels. Great for those who like a bouncy feel.
- · Memory Foam: Known for pressure relief and contouring to the body. Ideal for side sleepers and those with joint pain.
- Latex: Offers a more natural option, with responsiveness and cooling properties. Suitable for those looking for eco-friendly materials and a cooler sleep.
- Hybrid: Combines layers of foam (or latex) with innerspring coils, offering a balance of support, comfort, and cooling. Good for those who want the best of both worlds.
- Adjustable Air Mattresses: Allow you to control the firmness. Perfect for couples with different preferences and those with specific support needs.

2. Consider Your Sleeping Position

- * Side Sleepers: Usually benefit from medium to soft mattresses that cushion the shoulders and
- Back Sleepers: Often need a medium-firm mattress that supports the lower back.
- Stomach Sleepers: Typically require a firmer mattress to keep the spine aligned.
- Combination Sleepers: Should look for a responsive mattress that facilitates movement and offers balanced support.

3. Check for Support and Comfort

- Support: Ensures the mattress keeps your spine in alignment without creating pressure points.
- · Comfort: The top layers should offer cushioning that feels comfortable to you, whether that's plush or firm.

4. Consider Your Body Weight

5.0 out of 5 stars Chocolate with peanut butter???

Chocolate peanut butter cookie dough review; Firstly, the color of the packaging was fresh and vibrant in color. Reminded me of how classy I'd be if I ate it. I thought about throwing on a suit and top hat just for the occasion. I didn't. Opening the beautiful container, I enjoyed a walt of chocolate through one of of my nostrils, since my other was clogged. Enticing.... As my mouth began to water, I noticed how dark and mesmerizing the color of the frozen sugar milk was and I gasped out loud. As I captured the creamy dream on my scooping utensil I teared up realizing how rich and creamy the taste would be on the muscle in my mouth. No one was watching. Nows the time. Slowly stick it in. I did. First, I noticed a cold and creamy texture on my the tip of my wet muscle. But as I bit down.....so much crunch. Astonishing. Chocolate flavor went bursting into my mouth with the greatest of ease. And then came the cookie dough familiarity. ...that's when it took me back home. To the days I was in the parlor with my uncle Tomhe made me feel so safe and secure with his homemade ice cream before the eventual brutal rape. Then I tasted it. That dreadful lick. Reminded me of burnt pigeon hair after a feeding. Or maybe licking a rooftop on a hot summer day and just letting the long thick muscle burn. Peanut Butter it was. How devastating to ruin a beautiful naked cupid on a rainbow by pouring molten hot lava down its throat and watching him burn from the inside. I lost a little of my soul loday. I thought I would have my soul be fulfilled for centuries, but instead had it set on fire and thrown off a remote diff. i

Classify and summarize what they like. Classify and summarize what they don't like

(8)

ChatGPT

Based on the reviews provided, here's a detailed market research analysis:

1. What people like the most:

- * The combination of chocolate and peanut butter is highly appreciated.
- * Customers enjoy the texture, especially the chunky swirls and thick ripples of peanut butter.
- The flavor of the ice cream is described as rich, with a good balance between the sweetness of chocolate and the saltiness of peanut butter.
- * Many reviews mention an "addictive" quality to the ice cream.
- The presence of large chunks or "nuggets" of peanut butter is repeatedly praised.
- Some customers appreciate the dark chocolate flavor, which seems to be a unique selling point for this product.

2. What they do not like:

- There are complaints about the ice cream having an insufficient amount of peanut butter, with some mentioning a lack of peanut butter taste.
- A few reviews note that the peanut butter is too hard, affecting the overall texture.
- * The size of the packaging is a concern, with some customers finding it too small.
- There are negative comments about the price point, with the perception that it is too high, particularly given the size.
- * Issues with delivery, such as the ice cream arriving melted, have led to dissatisfaction.

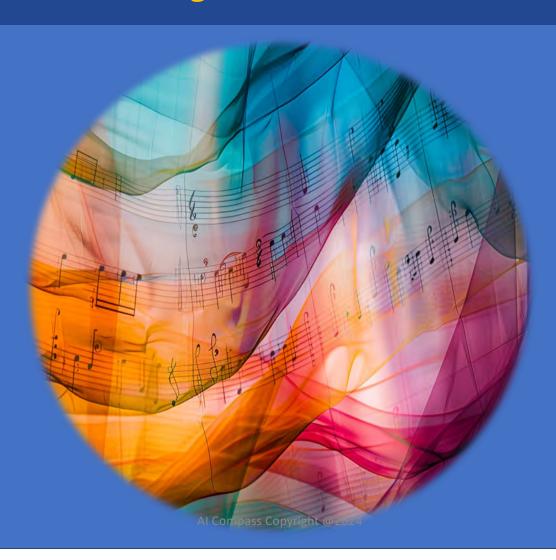

Examples:

- Categorize social media customer comments into "Positive," "Negative," or "Neutral."
- Classify according to the type of messages:
 - complaint,
 - information request,
 - quote request,
 - review

7

Synthesis

give recommendations for a competitive brand that wants to launch a new ice cream.

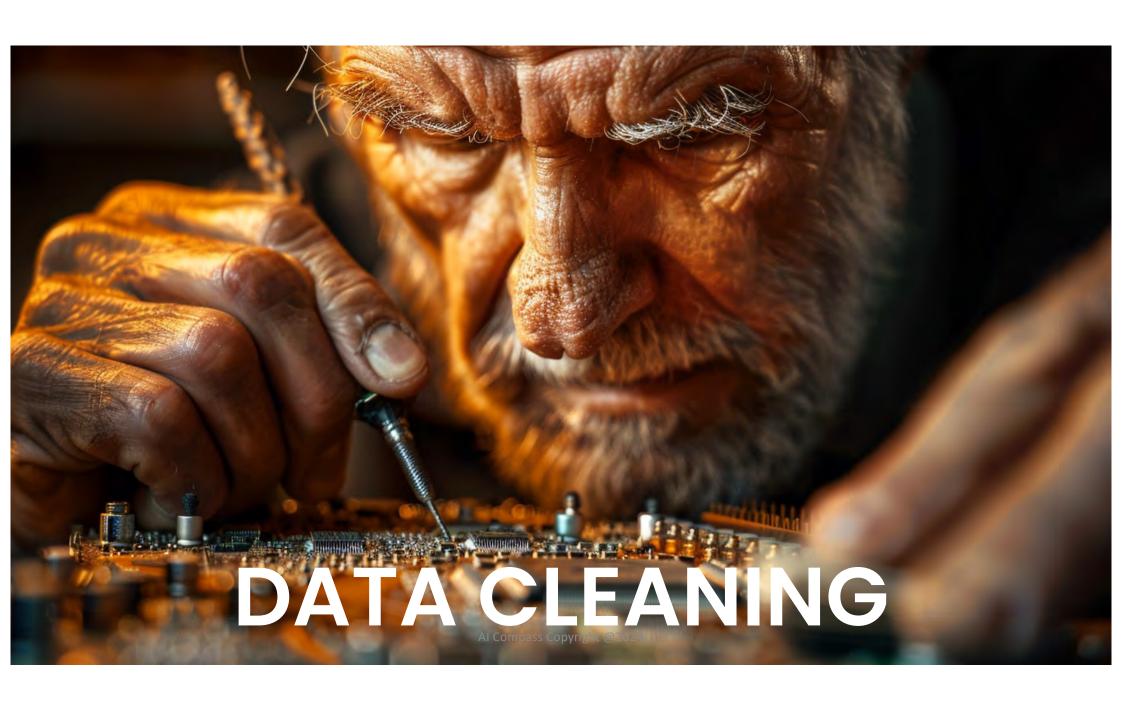

3. Recommendations for a competitive brand launching a new ice cream:

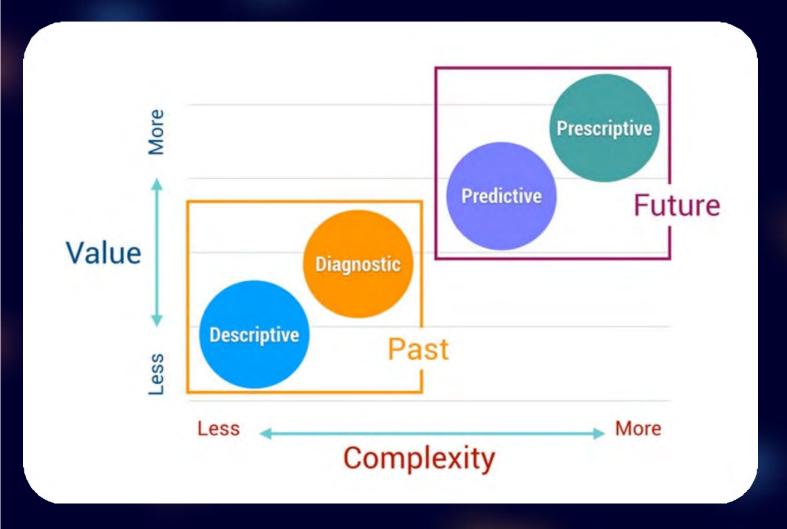

- Flavor Balance: Ensure a consistent and satisfying balance of chocolate and peanut butter flavors. Consider emphasizing the use of dark chocolate if it aligns with brand positioning.
- Texture: Focus on perfecting the texture, ensuring that the peanut butter is neither too hard nor too scarce. Achieve a creamy consistency that incorporates peanut butter elements that are easy to bite into.
- Packaging Size and Price: Offer a variety of sizes at competitive price points. Larger sizes
 could appeal to those who find the current options too small.
- Quality Control in Delivery: Implement robust packaging solutions to prevent melting during delivery. Guaranteeing product quality upon arrival will address a critical pain point.
- Marketing: Highlight any unique aspects of the ice cream, such as premium ingredients, unique flavor combinations, or health-conscious options if applicable. Emphasize customer satisfaction with texture and taste in marketing campaigns.

In conclusion, a new competitor should aim to replicate the beloved chocolate and peanut butter combination while addressing the texture and size concerns. Maintaining high-quality standards in production and delivery will be crucial to competing successfully in this market segment.

Describe a photo

ChatGPT

This photograph captures a moment of urban life, likely in a European city, where the architecture and the activities suggest a blend of tradition and daily hustle. The scene takes place in an arched gallery paving the way to a deeper street perspective.

The focus of the image is a man, possibly a waiter, stepping out from what appears to be a restaurant or café. The establishment has a classic aesthetic, with a deep red façade and door frames, and large windows that allow a peek inside to the white-clad chefs or kitchen staff at work. The word "HEGAR" is visible above the door, suggesting either the name of the establishment or an indication of its heritage.

The waiter is in motion, dressed in a white shirt, a dark vest, black trousers, and a bow tie, carrying a tray with colorful items that look like drinks or possibly desserts. He is wearing a face mask, indicating that the photo was taken during a time when health precautions were in place, possibly during or after the COVID-19 pandemic.

Behind him, the street recedes into the distance, lined with similar architectural styles, shops, and people in various states of motion. One person in particular, in the midground, is dressed in business attire carrying a briefcase, suggesting the photo was taken on a weekday during working hours.

The lighting is soft, indicating either morning or late afternoon, casting gentle shadows and giving the image a warm tone. The composition balances the activity and life of the city with the stillness of the architecture, providing a snapshot of life in a bustling urban environment.

Identify Ingredients

ТМ

what ingredients do you see here? and what coan you cook with it?

Al Compass Copyright @2024

what ingredients do you see here? and what coan you cook with it?

I see several ingredients in the image:

- 1. Arborio rice (commonly used for risotto).
- 2. Olive oil or another type of cooking oil.
- 3. Sliced grilled chicken pieces.
- 4. Chorizo or a similar type of sausage.
- 5. Clams.
- 6. Mussels.
- 7. Peeled shrimp.
- 8. Sliced onions.
- 9. Tomato sauce or crushed tomatoes.
- 10. Saffron strands in a liquid (possibly water or broth).
- 11. Garlic cloves.

- 9. Tomato sauce or crushed tomatoes.
- 10. Saffron strands in a liquid (possibly water or broth).
- 11. Garlic cloves.
- 12. Black pepper.
- 13. Salt.
- 14. A clear liquid, possibly water or broth.

Given these ingredients, you could make a delicious seafood paella. Paella is a Spanish rice dish that often includes a combination of chicken, seafood, sausages, and various seasonings, cooked together with rice in a wide, shallow pan. The saffron would give the rice its characteristic yellow color and a distinct flavor.

Basic Seafood Paella Recipe:

- 1. Heat the oil in a large paella pan or wide skillet.
- 2. Sauté the onions and garlic until translucent.
- 3. Add the chorizo and chicken, cooking until browned.
- 4. Stir in the rice, ensuring it's well-coated with the oil.
- 5. Add the tomato sauce and the liquid with saffron, followed by the broth or water. Allow the mixture to simmer.
- 6. Once the rice is partially cooked, add the mussels, clams, and shrimp.
- 7. Continue to cook until the rice is tender, the mussels and clams have opened, and the shrimp is pink and opaque.
- 8. Season with salt and pepper to taste.
- 9. Serve hot, garnished with lemon wedges if desired.

This is just a basic guideline, and you can adjust the ingredients and their quantities Al Compass Cappaing to your preferences. Enjoy your meal!

Problem Solver

$$(X+3)^2=4$$

Solve the following equations:

- 1) 8x + 11 = 4x + 14
- 2) 7d-4=11d-9

you are great at math, and good in solving problems please solve x in these 4 problems

ChatGPT

Error analyzing >

It seems there was an internal error when trying to solve the equations. Let's try again to solve these problems. [-]

Here are the solutions to the given problems:

- 1. For the equation $(x+3)^2=4$, the solutions are x=-5 and x=-1.
- 2. For the equation 8x + 11 = 4x + 14, the solution is $x = \frac{3}{4}$.
- 3. For the equation 7d-4=11d-9, assuming d as x, the solution is $x=\frac{5}{4}$.
- 4. For the right-angled triangle with sides 3 and 4, and hypotenuse x, by the Pythagorean theorem, the solutions are x=-5 and x=5. Since a length can't be negative, the appropriate solution is Al Compass Copyright @2024 x = 5.5

A portrait of a fierce female Viking warrior

Prompt

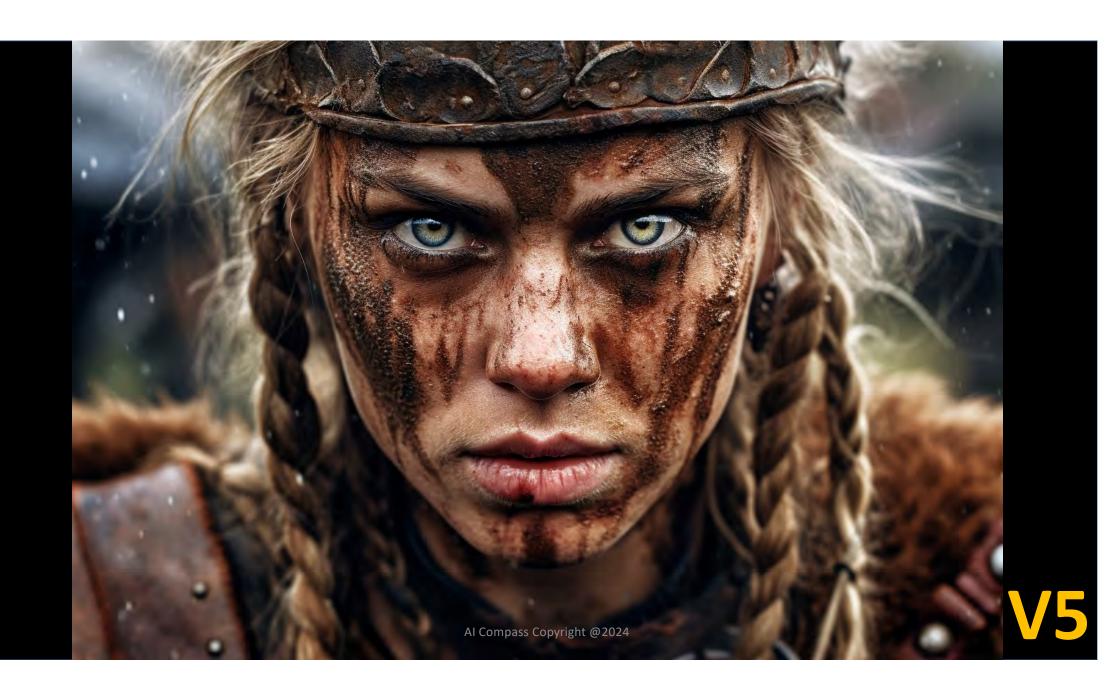

A powerful and captivating portrait of a fierce female Viking warrior, mid-battle cry, capturing the raw intensity and ferocity in her eyes as she prepares for combat. This ultra-realistic image brings to life every intricate detail of her battle-worn armour, tattoos, and weathered face, showcasing her indomitable spirit and strength. The photograph is expertly taken with a Nikon D850 camera, paired with a 70-200mm f/2.8 lens, renowned for its exceptional sharpness and ability to render vivid colours. The camera settings include an aperture of f/4, ISO 400, and a shutter speed of 1/200 sec, expertly balancing the natural light and shadows to emphasize the emotion and determination in the Viking's eyes. The composition juxtaposes the powerful warrior against a rugged, stormy backdrop, capturing the very essence of the Viking spirit in a breath-taking, high-resolution image that transports viewers back to a time of legendary battles and untold stories.

Product policy management as part of sustainable marketing strategy

Ana Pap, M. Sc. Econ., assistant

ABSTRACT

The product as an element of the marketing mix represents the primary mannism through which a value is provided to the consumer. If we add the fact that it is precise decisions related to product design that determine the types of resources, production processes, and the nature and type of future flows of waste, it is clear that product policy management is a lew jissue to sustainable marketing strategy management is a lew just one to sustainable marketing strategy.

The purpose of the present study is to analyse and discuss the key elements and present products and the issues in green product policy management with the goal of contributing to suistainble marketing strategy effectiveness. Marketing managers in the modern marketing environment must consider all of these issues because in the none future enbedding the elements of sostabability into business processes will no longer present the source of competitive advantage, but the precondition of competitive party on the global market.

1. Introduction

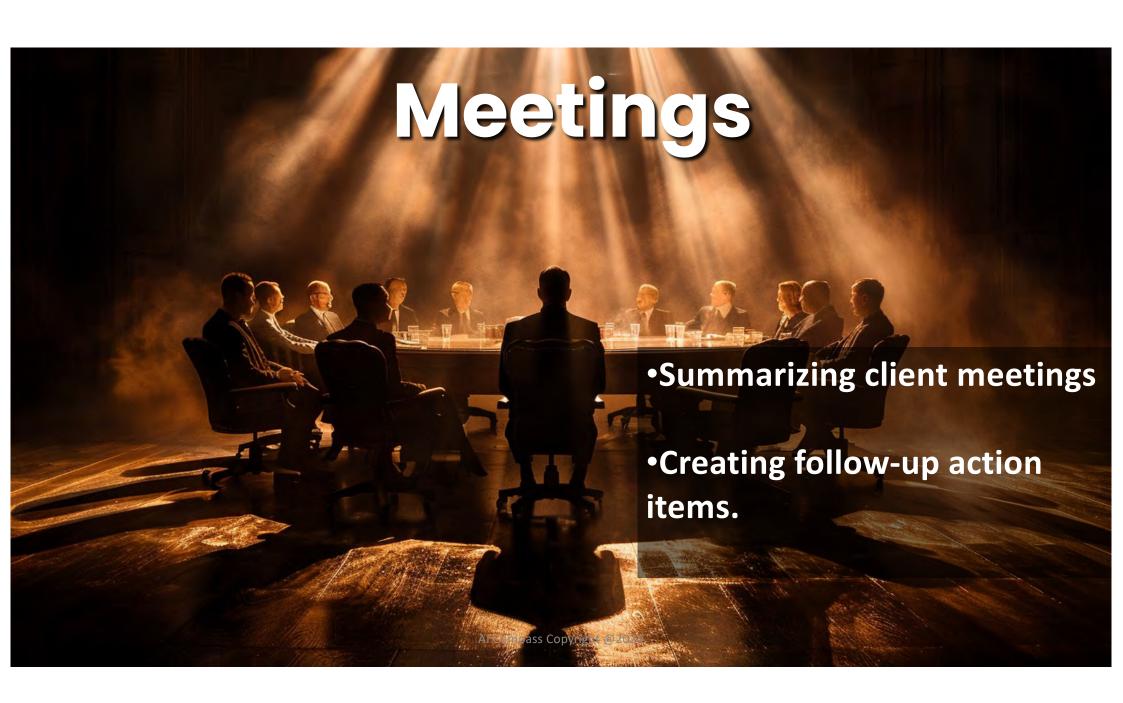

mix can be identified within the sustainable marketing strategy

pushity are no longer an adequate prerequisite for finding their way to the consumera-quality are no longer an adequate prerequisite for finding their way to the consumera-lncreasingly growing ecological awareness has placed demands before producers for making products that meet high ecological standards. Therefore, we can say that the environmental acceptability has become "added quality" to the product.

The AdSecrets Marketing Classics Series

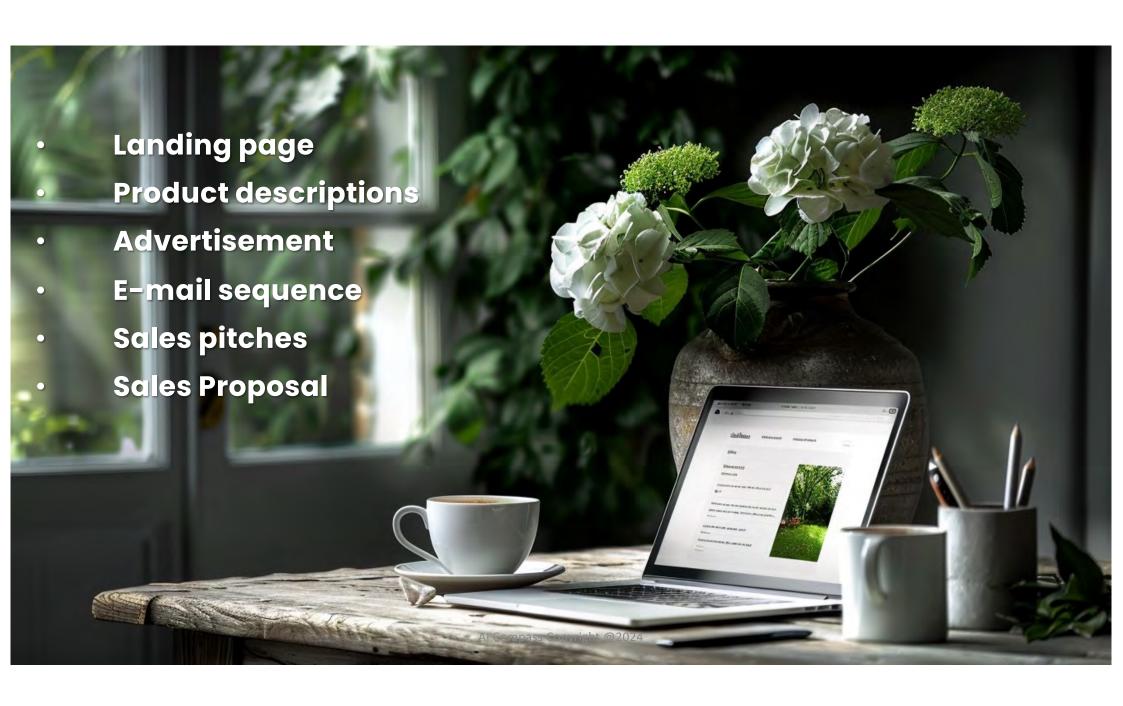

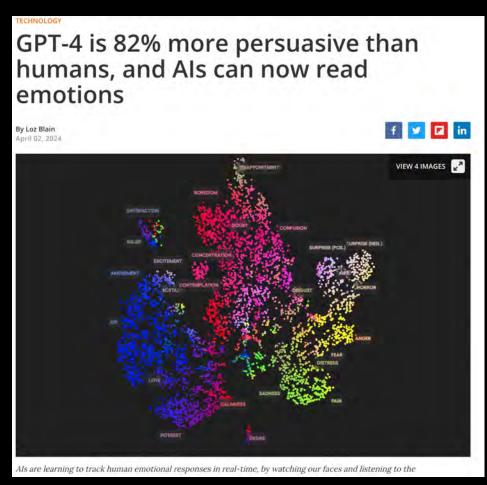

A study conducted by researchers at the Swiss Federal Institute of Technology Lausanne (EPFL)

Methodology:

- •Participants: 820 individuals were selected to engage in debates on a variety of topics. These included both low-emotion issues like whether pennies should continue to be used as currency and highly charged topics such as the role of race in college admissions.
- •Process: Each participant was randomly assigned a debate topic and paired against either another human or GPT-4. Before the debates, participants provided demographic information like age, gender, race, education level, and political affiliation.
- •Persuasion Tactics: When GPT-4 was given this demographic information, it tailored its arguments specifically to the individual it was debating against, making it much more persuasive.

When GPT-4 was provided with demographic information about the participants, it became **81.7%** more effective at persuading them compared to human debaters.

The big shift happening right now

"The development of AI is as fundamental as the creation of the microprocessor, the personal computer, the Internet, and the mobile phone. It will change the way people work, learn, travel, get health care, and communicate with each other. Entire industries will reorient around it. Businesses will distinguish themselves by how well they use it."

"There going to be two kinds of companies at the end of this decade:

Those that are fully utilizing Ai and
Those that are out a business

I think it is that black and white "

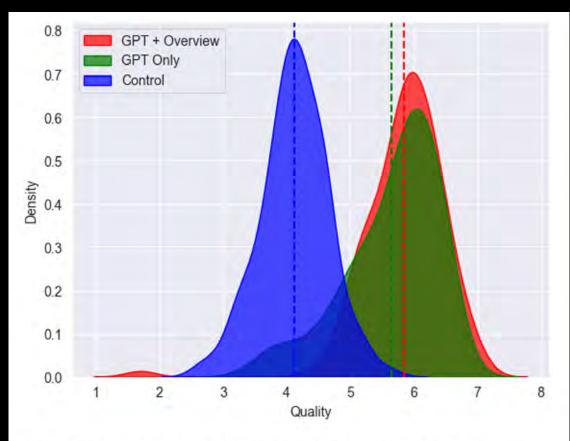

Peter Diamandis

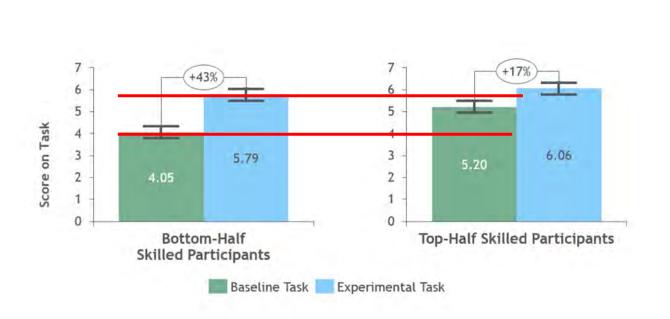

AI increases Productivity

Notes: This figure displays the full distribution of performance in the experimental task inside the frontier for subjects in the three experimental groups (red for subjects in the GPT+Overview condition; green for subjects in the GPT Only condition; blue for subjects in the control condition).

consultants with Al vs without Al

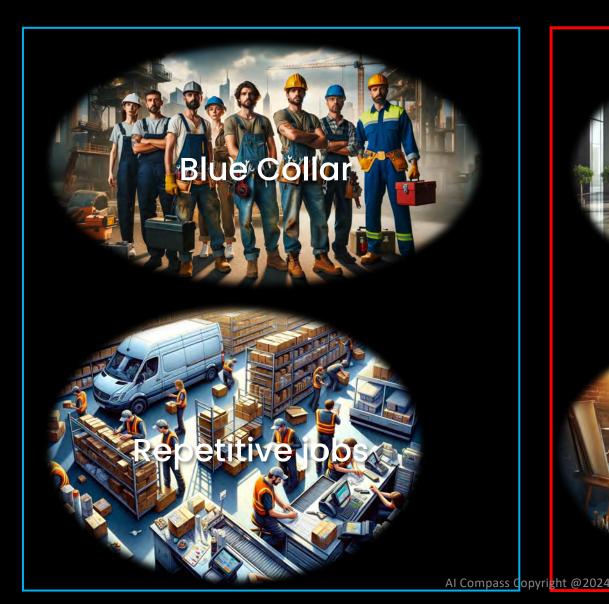

- Finished 12,2% more tasks
- Completed tasks 25% more quickly
- Produced 40% higher quality results

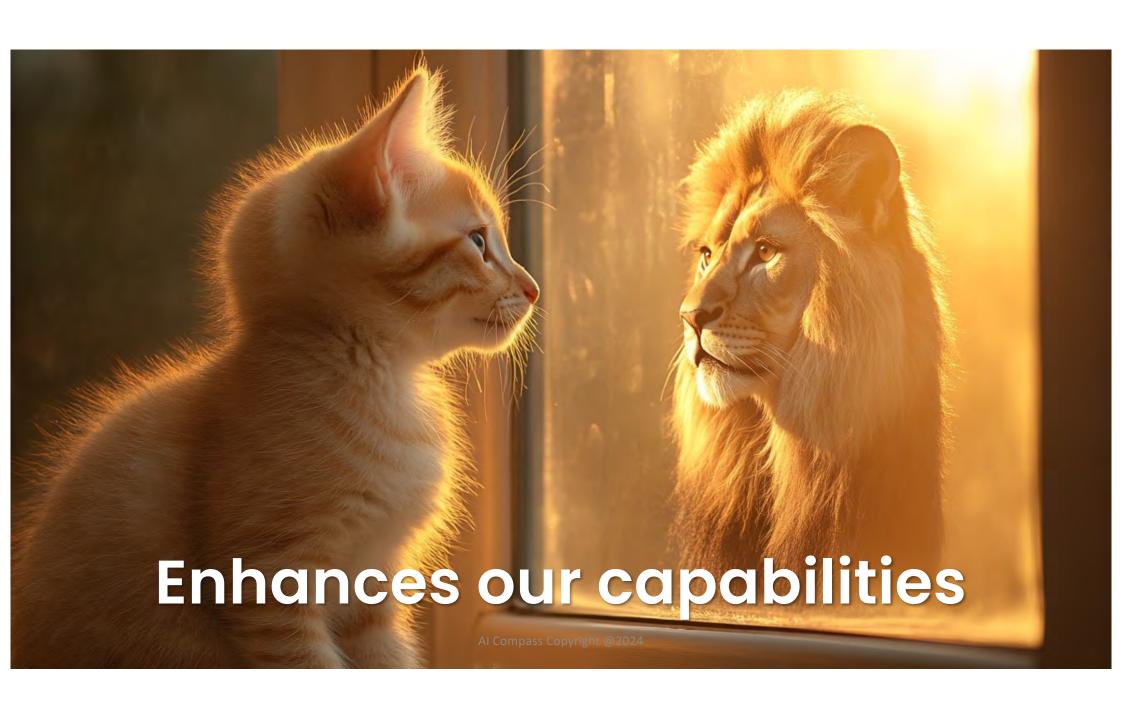

Notes: This figure displays the average performance of subjects in the bottom-half performance distribution in the assessment task (on the left), and those in the top-half performance distribution in the assessment task (on the right). The bars in green report their performance in the assessment task, while the bars in blue report their performance in the experimental task. The y-axis is labeled with the average scores (on a 1-10 scale).
